Pics 003.jpg>> hanie / Julie...

As per our discussion please note that tenant Compass Environmental has  
constructed a drum storage pad on Compass Big Blues F5 parcel to contain  
materials generated during the cleaning of railcars. Most material  
consists of food grade product, but their crews are trained to handle an  
array of wastes.

All generated waste is managed in accordance with RCRA and DOT.  
Materials that are characteristically hazardous are shipped from CBB to  
appropriately permitted TSDF's under our EPA Identification Number.  
If you have any further questions or comments please let me know and I  
will work with Compass Environmental operations to respond accordingly.  
Thank you,  
Glen
